Excursion – A visit to the Fire Station

The students of class Prep went for an educational trip to the Fire Brigade Station located at the Pune Cantonment. The trip was long awaited by the students as it was their first excursion out of the school.

The trip began with the enthusiastic and fun filled children's cheer. We reached the fire brigade station in some time and were welcomed by the group of fire

brigade men. They began with the demonstration of the fire engine truck moving out of the premises with a siren and ringing of the bell.

They conducted the extinguishing of fire drill and showed the different types of hose with different types of fittings.

Also one of the firemen dressed himself in the non extinguishable suit and the other man wore the mask with oxygen cylinder on his back .The children were thrilled to see all the drills performed .The students then were excited to see the entire show.

They took autographs from these firemen as the children felt that they are the real heroes Children came back with awe in their eyes. After coming back to the class they all were asked to draw whatever they saw.
